FOR IMMEDIATE RELEASE
January 17, 2023

Mossberg International, Inc.™ Imports SA-28 Field Synthetic Autoloader

North Haven, CT – Known for their quick-handling and lightweight characteristics, the SA-Series of autoloading shotguns are built for days afield or at the range busting clays. Now joining the family of 20-gauge, 28-gauge, and 410 offerings is the new **SA-28 Field Synthetic** version with versatile 26-inch vent rib barrel.

The all-purpose SA-Series Field autoloaders begin with a well-designed gas operating system that vents excess gases, reducing recoil for the shooter and lessening stress on components for smooth, reliable operation. Other standard features include a cross-bolt safety; extended charging handle; and easy-load elevator.

SA-28 Field Synthetic (75803) – This lightweight autoloader is housed in a durable black synthetic stock and forend with complementing matte blue metal finish and features a five-round total capacity (2.75-inch). The 26-inch vent rib barrel is topped with a front bead sight and is threaded for use of interchangeable chokes. The Field versions come with the Sport Set of choke tubes which includes Full, Improved Modified, Modified, Improved Cylinder, and Cylinder chokes. MSRP: \$721

Make your day in the woods or at the range more enjoyable by carrying one of the SA-Series small-gauge autoloaders. For more information on the complete line of SA-20, SA-28 and SA-410 shotguns, please visit www.mossberg.com.
