Mossberg® Introduces Enhanced 940® Pro Tactical SPX Semi-Automatic Shotgun

NORTH HAVEN, CT – Mossberg has refined its widely-popular 940 Pro Tactical 12-gauge semi-auto shotgun with new and highly-desired tactical features: introducing the **940 Pro Tactical SPX** shotgun. Based on Mossberg's cleaner-running and redesigned 940 Pro gas-operating system, this feature-rich, optic-ready platform is available in 8-Shot or 5-Shot versions with 18.5-inch AccuChoke®-compatible barrels. Initially, five models are available including a Holosun® Micro Dot Combo and optional Cerakote® finishes.

Like all 940 Pro shotguns, the 940 Pro Tactical SPX has corrosion-resistant internal parts and finishes including nickel boron-coated gas piston, magazine tube, hammer, and sear. And the cleaner-running gas vent system allows for longer cleaning intervals and smooth, reliable operation. Standard features of the 940 Pro platform include an optic-ready receiver for direct mounting of micro dot optics (RMSc footprint); drilled and tapped receiver; oversized ergonomic bolt release; knurled and extended charging handle; enlarged and beveled loading port; elongated, pinch-free elevator; bright orange anodized follower; 18.5-inch AccuChoke barrel with Cylinder choke tube provided (other choke tubes sold separately); and extended magazine tube with 7+1 round capacity (2.75-inch shells). The durable synthetic stock is self-draining and has a user-adjustable length-of-pull with a range of 12.5 – 14.25 inches with the use of inserts. Further adjustability is provided for drop at comb and cast with the use of incremental stock shims. The grip area features Mossberg's signature aggressive texturing and completing the stock is a rear swivel stud.

Updated Features of the 940 Pro Tactical SPX:

- An innovative forend design that features integrated heat shield, two QD cups, three M-LOK® mounting slots (3, 6, and 9 o'clock positions), and Mossberg's signature texturing.
- Stabilizing barrel clamp with two-sided M-LOK mounting slots and swivel studs.
- Two QD mounting cups on stock (right and left) allow the sling mount to be positioned in 90-degree increments (3, 6, and 9 o'clock positions).
- Rear Ghost Ring and front fiber optic sights with protective, low-profile wings. Simply remove the Ghost Ring sight and the receiver is optic ready for the direct mounting of micro dot sights.
- Adapter plates provided for optic-ready receiver for mounting RMR®, Docter™, and Leupold® footprints to the optic cut in the receiver which is covered by certain patents and patent pending.
- Redesigned, oversized ambidextrous safety.
- Redesigned one-piece magazine tube for ease of maintenance and improved reliability. Magazine spring is retained for ease of removing and attaching barrel.
- A detachable sleeve protects the magazine tube and secures forend.
- Vang Comp® 6-Shotshell Carrier Card with Velcro® mounting plate and hook-and-loop card attachment system.
- Durable Cerakote coatings (Flat Dark Earth and OD Green) on barreled actions of select models for added wear and corrosion protection.

Safety and safe firearms handling is everyone's responsibility.

Available models include **(85162) 940 Pro Tactical SPX 8-Shot** – black synthetic model with matte blue metal finish; **(85177) 940 Pro Tactical SPX 8-Shot Cerakote (Flat Dark Earth)** – black synthetic model with FDE metal finish; **(85178) 940 Pro Tactical SPX 8-Shot Cerakote (OD Green)** – black synthetic model with OD Green metal finish; **(85180) 940 Pro Tactical SPX 5-Shot** – black synthetic model with matte blue metal finish; and **(85179) 940 Pro Tactical SPX 8-Shot Holosun Micro Dot Combo** – black synthetic 8-shot model with mounted Holosun 407K sight. This durable optic provides twelve brightness settings, 6 MOA dot reticle, and 50K hours battery life.

Mossberg continues to refine and enhance the optic-ready 940 Pro Tactical platform. And the **940 Pro Tactical SPX** autoloader lives up to the title of a true fighting tactical shotgun, designed for functionality, reliability, and longevity.
