Mossberg Int’l. Adds Maverick® SA Semi-Auto Shotguns to Lineup

NORTH HAVEN, CT – Mossberg International is pleased to announce the introduction of the Maverick® SA Semi-Auto line of shotguns, a versatile, value-focused semi-automatic platform built to deliver reliable performance season after season. The Maverick SA continues Mossberg International’s tradition of offering quality, dependable shotguns at an accessible price point.

The new 12-gauge Maverick SA Semi-Auto shotguns are engineered as true multi-season workhorses, chambered for both 2.75-inch and 3-inch shotshells and featuring a 6-shot capacity. Available with either classic walnut stocks or durable synthetic furniture, the Maverick SA line offers configurations suited for a variety of shooting environments and personal preferences.

A key feature of the Maverick SA platform is its adjustable length-of-pull stock system, which utilizes removable spacers to allow incremental adjustment from 12.5 inches to 14.25 inches. This adaptable design provides improved fit and comfort for a wide range of shooters, enhancing control and consistency in the field.

Select models are offered with attractive satin-finished walnut stocks, featuring checkered grip and forend panels and a distinctive engraved grip logo, blending traditional styling with modern semi-auto performance.

The Maverick SA is equipped with a cross-bolt safety located at the rear of the trigger assembly for convenient, ambidextrous operation. Standard features also include a gas-vent operating system for smooth, reliable cycling and a quick-empty bolt release button that allows for fast, simple unloading.

Each Maverick SA shotgun is fitted with a 28-inch vent rib barrel and front fiber optic sight for quick target acquisition and includes Mossberg’s proven Accu-Choke® system, providing versatility across hunting and sporting applications.

With the introduction of the Maverick SA Semi-Auto line, Mossberg International continues its commitment to delivering reliable, affordable shotguns designed to meet the demands of shooters around the world.

For more information on the Maverick SA Semi-Auto line, please visit www.mossberg.com.
