**Mossberg® Releases 590M® Mag-Fed Standoff Pump-Action Firearm**

**NORTH HAVEN, CT** – Mossberg has added a **590M Standoff pump action** to its line of 590 magazine-fed firearms. This 12-gauge, 2.75-inch pump action features a 14.25-inch heavy-walled, standoff barrel and is fed from the first production shotgun double-stack magazine. This well-designed platform provides better balance and weight distribution combined with greater capacity in less magazine length than competitor’s single-stack magazines. And the 590M offers added versatility with the convenience of 5, 10, 15, 20-round accessory magazines.

The innovative design of Mossberg’s 590M Mag-Fed platform starts with the detachable magazine’s integral stabilizing ribs which engage the magazine directly to notches engineered into the receiver for a positive lock-up. The all-steel magazine release button and housing are optimally positioned in front of the trigger guard and will not interfere with cycling of the action.

The 590M double-stack magazines are constructed with hardened-steel feed lips, over-molded steel shell ramps and an anti-cant, rounded follower to ensure reliable feeding. Additional features include an easy-grip, molded external shell; proprietary self-lubricating polymer magazine body; heavy-duty ASTM-A-228 music-wire magazine spring for prolonged service life; removable floor plate for ease of cleaning; and durable black oxide finish on the steel components.

**Key Features of the 590M Standoff Pump-Action Firearm:**

- 14.25-inch heavy-walled, cylinder bore barrel with standoff muzzle.
- One-piece construction of the stand-off barrel, machined integrally to the barrel.
- Mossberg’s Aftershock bird’s head grip which minimizes recoil and ensures a firm, sure grip.
- Parkerized metal finish.
- Oversized and redesigned top-mounted safety with highly visible red indicator and easily operated by right or left-handed shooters.
- Compact forend that utilizes M-LOK®-compatible slots for mounting accessories to sides and bottom.
- Drilled and tapped receiver.
- One ten-round detachable, double-stack magazine. Accessory magazines available in 5, 10, 15, and 20-round capacities (sold separately).
