FOR IMMEDIATE RELEASE  
January 17, 2017

## **Mossberg® Delivers Competitive Edge with MMR™ Pro Rifle** *3-Gun AR featuring New Mossberg JM Pro Match Trigger*

**North Haven, CT** – Joining Mossberg’s line-up of versatile MMR semi-auto rifles is the competition-ready **MMR Pro**, chambered in 5.56mm NATO/223 Rem. Designed with the 3-Gun shooter in mind, this full-featured AR is built for peak performance, beginning with Mossberg’s new JM Pro Match Trigger, suppressor-ready SilencerCo® muzzle brake; an 18-inch stainless steel barrel; and highly-coveted Magpul® accessories. Mossberg delivers a winner with the MMR’s proven platform, combined with the most desirable features to give you a competitive edge.

At the core of the MMR Pro is a direct-impingement gas system for smooth, shot-after-shot reliability; 7075 T6 aluminum-forged receiver; free-floating, 18-inch button-rifled, 416 stainless steel barrel with 1:8 RH twist rate; phosphate and Mil-Spec hard-coat anodized metal finishes; forward-assist; and ejection-port dust cover. The MMR Pro comes with a 30-round Magpul PMAG® magazine.

Setting this competitor apart from its challengers is Mossberg’s JM Pro Drop-In Match Trigger which features a patented design for a crisp, creep-free trigger break (4 pounds) and user-adjustable overtravel. Designed in conjunction with Jerry Miculek, World-Champion 3-Gun competitive shooter, the JM Pro Match Trigger Precision is precision-machined to ensure consistent shot-after-shot reliability. The stainless steel barrel is equipped with a SilencerCo ASR 3-port muzzle brake, which features their suppressor-ready ASR mounting system (compatible with multiple suppressor models – 1/2x28TPI). The 3-port design effectively reduces felt recoil and muzzle climb. Incorporated into the 15-inch slim profile forend is Magpul’s M-LOK® system for the simple attachment of M-LOK compatible accessories. The full-length top rail will accommodate your choice of optics or accessories.

The furniture package on the MMR Pro includes a Magpul MOE+® grip and trigger guard; designed for a comfortable, hand-filling grip with anti-slip texturing. The hollow core of the grip will also accept optional Magpul accessory storage cores. Mossberg brings a well-designed, 6-position adjustable stock to the MMR Pro. An 11” to 14.25” length-of-pull (LOP) is easily-adjusted with the integrated lever. And fine-tune your LOP with the Mossberg FLEX™ TLS™ (Tool-Less Locking) System connector, allowing the user to easily interchange recoil pads for LOP flexibility. Choose from three FLEX recoil pads, ranging from .75” thickness to 1.50” thickness (MMR Pro comes with small FLEX recoil pad; others sold separately). The stock also features three QD swivel mount locations; and both stock and grip/trigger guard feature non-reflective, black finishes. Rounding out the key features is the AXTS Raptor™ ambidextrous charging handle, constructed of Aircraft grade 7075 aluminum and Mil-Spec anodized. The design allows for rapid, fluid palm “blading” or finger thumb charges from either strong or support side.

When shaving seconds off your score counts, the Mossberg MMR Pro delivers the winning edge with its performance-driven features, built proudly on the proven MMR platform. For complete specifications and available models of the Mossberg MMR semi-auto, please visit [www.mossberg.com](http://www.mossberg.com).

***Safety and safe firearms handling is everyone’s responsibility.***
