Mossberg® Introduces Patriot™ Predator® 6.5 PRC Bolt-Action Rifles

NORTH HAVEN, CT – Joining the family of suppressor and optics-ready Patriot Predator bolt-action rifles is the newest cartridge to dominate long-range shooting, the 6.5 PRC (Precision Rifle Cartridge). These purpose-built rifles are housed in a durable Flat Dark Earth (FDE) synthetic stock with matte blue metalwork and TrueTimber® Strata™ camouflaged-synthetic stock with Patriot Brown Cerakote® metal finish and are packed with premium features to deliver tack-driving performance in the 6.5 PRC chambering.

For extended-range performance in the field or at the range, the 6.5 PRC, designed for short-action, bolt-action rifles, offers a balance of velocity and manageable recoil combined with a flat trajectory. Inherently accurate with its exceptional ballistics to beyond 1000 yards, the 6.5 PRC delivers long-range performance in the compact Patriot Predator rifle.

The Patriot Predator features Mossberg’s proven twin-lug, push-feed machined-steel action, fed from a lightweight polymer, flush 4-round box magazine. The standard contour, free-floating 24-inch barrel features a 1:8 twist rate, straight-edge fluting and is threaded (5/8”- 24 threads per inch) for the addition of a suppressor. A protective cap is included. The barrel is constructed of carbon steel and features a matte blue or Patriot Brown Cerakote finish. Every Patriot rifle features Mossberg’s patented LBA™ (Lightning Bolt Action™) user-adjustable trigger with a 2 to 7-pound range of adjustment, to help provide consistent shot-after-shot placement. A top-mounted Picatinny rail provides for ease of mounting and repositioning optics. And completing this performance-driven bolt-action package are oversized bolt handle; spiral-fluted bolt; and sling swivel studs.

The classically-styled stock on the Patriot Predator rifle is well-designed for comfort and reduced felt recoil with its straight comb, rounded edges and raised cheekpiece. Giving the stock a modern feel is textured stippling on the grip and three surface areas of the forend. Choice of FDE or TrueTimber Strata camo-finished stocks provide for greater versatility through multiple seasons and varied terrain. A polymer block insert with integral magazine well provides a simple, but effective bedding platform. Rounding out the stock design is a traditional black rubber recoil pad.

Looking to go long-range? Look no further than the Mossberg Patriot Predator bolt-action rifle chambered in 6.5 PRC. To see the complete line of Patriot rifles, please visit your local dealer or go to www.mossberg.com.
