FOR IMMEDIATE RELEASE

January 19, 2015

## **Mossberg® Patriot™ Bolt-Action Rifles Available with Premium Vortex® Optics Chose from Five Popular Calibers Factory-Mounted with Vortex Crossfire® II Scope**

**North Haven, CT** – The newest member of the Mossberg centerfire family, the **Patriot** bolt-action rifle, is now available in a premium scoped combo package featuring the latest riflescope technology from Vortex Optics: the Dead-Hold™ BDC (Bullet Drop Compensation) reticle. Five popular calibers offering this scope option are available, ranging from 243 Win to 300 Win Mag, with a classically-styled walnut stock or black synthetic stock, matte blue metal finish and factory-mounted Vortex Crossfire II variable 3-9x40mm scope.

The newly-released Patriot series of bolt-action rifles combines the most requested features of our field-proven centerfire rifles in a re-engineered bolt-action platform. Hunter-inspired, these newly-designed rifles feature a streamlined bolt handle; aggressively-checked bolt knob; spiral-fluted bolt; and classically-styled stock. Modern textured stippling on the sides and bottom of the forend and grip provide for a positive hold in inclement weather and the straight comb design with raised cheekpiece provide comfort and less felt recoil. A black rubber recoil pad and sling swivel studs complete the traditional lines of the stock. In this convenient scoped combo package, choose from a handsome walnut stock or more weather-resistant black synthetic stock.

The Patriot rifle is based on Mossberg's proven twin-lug, push-feed, machined-steel action which is fed from a lightweight polymer, flush box magazine. The button-rifled, standard contour, free-floating 22-inch barrels are constructed of carbon steel, feature straight-edge fluting and 11-degree recessed crowns. Every Patriot rifle also features Mossberg's patented LBA™ (Lightning Bolt Action™) Adjustable Trigger System which provides a crisp, creep-free trigger to enhance accuracy and is user-adjustable from 2 to 7 pounds.

There's no compromising on the optics in this value-packed combo. The Crossfire II riflescope features a hard anodized, single-piece, aircraft-grade aluminum tube that is nitrogen-purged and sealed for waterproof and anti-fog performance. Long-eye relief; fast-focus eyepiece; fully multi-coated lenses; and resettable MOA turrets are standard features of the Crossfire II 3-9x40mm scope and its distinctive Dead-Hold BDC hash mark reticle eliminates guesswork on holdover and windage corrections.

Providing great value is a hallmark of the Mossberg brand and the Patriot Vortex-Scoped Combos are the latest addition to Mossberg's ready-to-take afield, value-added packages. For complete specifications on the new family of Patriot bolt-action rifles, please visit [www.mossberg.com](http://www.mossberg.com).

***Safety and safe firearms handling is everyone's responsibility.***
