Mossberg® 930™ Pro-Series Sporting Shotgun Gives Shooters a Competitive Edge *Designed in Collaboration with Professional Shooting Instructor, Gil Ash*

North Haven, CT – Continuing to expand the company’s line of high-performance autoloaders, Mossberg announces a newly-designed 12-gauge [930 Pro-Series Sporting](#) shotgun designed for the competitive clay shooter. As a member of the Mossberg Pro-Series family of shotguns, this handsomely-appointed 930 Sporting is built with special finishes, premium coatings and an ergonomically-designed walnut stock and forend to enhance performance and handle round-after-round of clay-breaking action. To provide that competitive edge, Mossberg collaborated with professional shooting instructor and renowned OSP® (Optimum Shotgun Performance) School founder, Gil Ash, on the design features of the 930 Pro-Series Sporting shotgun. And as an added bonus, every 930 Pro-Series Sporting purchase comes with a FREE 60-day trial subscription to the OSP School’s *Knowledge Vault*, a collection of instructional articles and videos on clays and wingshooting by Gil and his wife, Vicki Ash.

Unique to Mossberg’s Pro-Series shotguns are the boron nitride coatings on the gas piston, piston ring, magazine tube, hammer, sear, return spring plunger and return spring tube for enhanced corrosion resistance and ease-of-cleaning. And the shell stop, bolt slide and elevator receive additional finishing which reduces overall friction on internal parts and provides for faster follow-up shots.

The 930 Pro-Series Sporting 12-gauge, 3-inch shotgun has a dual vent-gas system for reliable operation and is housed in a semi-gloss-finished walnut stock and forend. The unique ergonomic design of the stock, with measurements formulated by Ash, provides for proper fit and eye alignment for most shooters; men, women and older teens. Mossberg’s 930 Stock Drop System allows for customization of fit with drop-at-comb adjustment shims. The slim-contoured forend has laser stippling for a positive grip. The complementing Tungsten-finished receiver is treated with a durable Cerakote™ protective coating and the 28-inch vent rib, ported barrel has a blue finish. Completing this handsome package is the “*Pro-Series Sporting*” logo engraved on the receiver.

This competition-ready shotgun features field-proven, performance-enhancing details including a beveled loading gate for quicker reloads; HiViz® TriComp™ fiber optic sight, which comes with interchangeable LitePipes of varied shapes and colors to maximize visibility in any competitive environment; and extended Briley® choke tube set (Skeet, Modified and Improved Cylinder) with handy carrying case. Each choke tube is engraved with constriction for ease of selection. The 930 also features a quick-empty release button which provides for convenient unloading of shells from the magazine. MSRP: \$1029

When you step up for the next target presentation, why not have a competitive edge with the 930 Pro-Series Sporting autoloader and access to the largest single library of shotgun instruction? For more details on the complete line of Mossberg Pro-Series shotguns, please visit www.mossberg.com.

Safety and safe firearms handling is everyone’s responsibility.
