Mossberg® Releases MC1sc™ Stainless Two-Tone Pistols

NORTH HAVEN, CT – O.F. Mossberg & Sons, Inc., a leading American firearms manufacturer, today announced the release of a new MC1sc (subcompact) handgun; the **Mossberg MC1sc Stainless Two-Tone** in 9mm; available in standard-frame and cross-bolt safety frame versions. The MC1sc Stainless Two-Tone subcompacts join the recently-introduced family of four MC1sc models as Mossberg's first semiauto pistols in the company's 100-year history.

The MC1sc Stainless Two-Tone features a bead-blasted, stainless-steel slide over a matte-black polymer frame. The stainless-steel slide features aggressive multi-angle serrations that provide positive slide manipulation and is topped with dovetail-mounted, low-profile white 3-dot sights. The durable frame is glass-reinforced which provides high impact and chemical resistance combined with high tensile strength and stiffness. The 3.4-inch barrel, constructed of stainless steel, features a black DLC (Diamond-Like Coating) finish and a 1-in-16 twist rate. Optional cross-bolt safety is available and is reversible for right or left-handed shooters.

Other standard features include a flat-profile trigger with integrated blade safety; short, tactile reset; reduced overtravel; and a 5 to 6-pound trigger pull weight. Trigger guards are oversized for ease of access and comfort. All MC1sc models come with a flush 6-round and an extended 7-round single-stack Clear-Count™ magazines. Constructed of a transparent, lubricious polymer compound, the magazines offer low friction and high wear-resistance, while providing quick at-a-glance assessment of the number of rounds loaded. MC1sc pistols also have a reversible magazine release, located behind the trigger guard. Featuring Mossberg's signature texturing, the grip has an added palm swell and grip angle, similar to a 1911, for a more comfortable, confident grip. And completing the MC1sc Stainless Two-Tone is our exclusive, patent-pending Mossberg STS™ (Safe Takedown System), which unlike competitive products, does not require the user to pull the trigger to disassemble for routine cleaning or maintenance.

Superior ergonomics, innovation and engineering expertise are at the core of the MC1sc family of 9mm pistols. For more information on the MC1sc Stainless Two-Tone and the complete line of Mossberg MC1sc semiauto pistols, please visit our website at <https://www.mossberg.com/category/series/mc1sc/>.
