Mossberg® Releases MVP® LC (Light Chassis) Bolt-Action Rifle **AR-Compatible, Lightweight Bolt-Action Target Rifles in 5.56mm and 7.62mm NATO**

North Haven, CT – What could possibly improve the accuracy and handling qualities of Mossberg’s groundbreaking MVP Series of bolt-action rifles? Why not add a lightweight, aluminum MDT® chassis; Magpul® Mil-Spec CTR® adjustable stock and MOE® pistol grip; SilencerCo® Saker™ muzzle brake; and adjustable bipod? O.F. Mossberg & Sons, Inc. is pleased to announce the **MVP-LC** bolt-action target rifle in 5.56mm NATO (223 Rem) and 7.62mm NATO (308 Win); both available in optional Vortex®-scoped combos. These AR-compatible bolt-actions utilize patented design features that accept and feed from AR-style magazines (AR15-style for 5.56mm NATO and both M1A/M14 and AR10-style for 7.62mm NATO models).

Housed in an aluminum, tan-finished, light chassis stock designed by MDT that provides a modular, ergonomic base, this MVP is engineered for accuracy with its V-shaped bedding and recoil lug area which only makes contact with the receiver at those points. The free-floating, medium bull barrel is threaded and comes with a SilencerCo Saker muzzle brake, utilizing the Trifecta™ quick-detach mounting system (thread cap included). The barrels, constructed of carbon steel, are button-rifled with 16.25-inch length and 1:7 twist rate in the 5.56mm NATO (223 Rem) chambering and the 7.62mm NATO (308 Win) sports an 18.5-inch barrel with a 1:10 twist rate. Both feature a matte blue finish on all metalwork. Enhancing the accuracy on this tack-driver is Mossberg’s Lightning Bolt Action™ (LBA™) Trigger System that delivers a crisp, creep-free trigger pull and is user-adjustable from 3 to 7 pounds. Machined from aircraft-grade aluminum and hard-coat anodized to military spec, preventing corrosion and minimizing wear, the LBA trigger system delivers the utmost in reliability and durability for consistent shot placement. Additional design features include: spiral fluted bolt; oversized tactical-style bolt handle; Picatinny top rail for ease of adding optics; and adjustable bipod. MVP-LC rifles come standard with Magpul P-Mag® 10-round magazines and with the patented designs of the MVP, you can use aftermarket AR15 (5.56mm NATO/223 Rem) and both M1A/M14 and AR10-style (7.62mm NATO/308 Win) aftermarket magazines.

The name, Magpul, is synonymous with creative design solutions that are simple-to-operate; so partnering this MVP-LC to Magpul’s CTR adjustable, length-of-pull (LOP) stock and MOE pistol grip is a perfect match. The CTR adjustable, black polymer stock is designed for light, fast action with its streamlined, A-frame profile. The Mil-Spec design also features a friction-lock system that minimizes excessive stock movement. An ambidextrous QD sling mount, rubber recoil pad and interchangeable height adjustment combs (3 included) add to the versatility of this stock. The black polymer MOE pistol grip has an ergonomic, hand-filling design combined with anti-slip texturing for comfort and includes a handy storage core.

Both calibers are available in **MVP-LC Scoped Combos** which include Vortex Optics Viper HS-T (Hunter Shooter Tactical) 4-16x44mm variable riflescope and rings. This versatile scope is built on a strong 30mm one-piece machined aluminum tube with target-style turrets for windage and elevation adjustments and boasts a hash mark-based, second-focal-plane reticle perfect for accurate holds at extended ranges.

Safety and safe firearms handling is everyone’s responsibility.

The Mossberg MVP Series of AR-compatible, bolt-action rifles were designed for versatility and shot-after-shot consistency in the field or at the range. And now the MVP-LC rifle with MDT light chassis, Magpul accessories, SilencerCo muzzle brake and optional Vortex Optics riflescope raises the bar for lightweight, custom-style target rifles. See your local Mossberg dealer today or visit www.mossberg.com for more details.
