Mossberg® Releases Scout Version of MVP® 7.62mm Bolt-Action Rifle AR-Compatible Bolt-Action with Multi-Rail Accessory System

North Haven, CT – Mossberg listened when our customers said that our AR-compatible MVP Series was the ideal platform for a scout rifle. For 2015, Mossberg is pleased to announce the **MVP Scout** rifle chambered in 7.62mm NATO (308 Win). The new MVP Scout features an extended top rail and two side-mounted short rails for ease of adding optics and accessories; an optional Scoped Combo version of the MVP Scout is also offered. These highly-innovative carbine rifles feature Mossberg's patented Dual Push™ bolt and patented Dual Latch™ designs that accept and reliably-feed from both M1A/M14 and AR10-style magazines, a first for bolt-actions!

The general-purpose Scout rifle was defined by the legendary Col. Jeff Cooper, and Mossberg has combined those key features in their MVP Scout 7.62mm NATO (308 Win) bolt-action rifle. This highly-versatile, short-action rifle has an 11-inch receiver/barrel-mounted Picatinny rail which provides a solid base for standard or long-eye relief optics. When used properly, with both eyes open, a low-power and forward-mounted scope provides the user with an unobstructed field-of-view as with open sights. The Picatinny rail and forward-mounted optic provide greater clearance in the ejection port area for quicker reloads. For sight system versatility, an integrated, rail-mounted, Ghost Ring rear sight is paired with a barrel-mounted, fiber optic front sight. Two handy Picatinny side rails, located near the front of the forend, provide for easy-attachment of tactical lights, laser or accessories. Chambered in 7.62mm NATO (308 Win), the MVP Scout features a compact 16 ¼-inch medium bull, carbon steel button-rifled, threaded barrel with an A2-style suppressor, with a 1:10 twist rate to optimize bullet performance. A protective thread cap is provided. Completing the Scout package is an adjustable, rifle sling.

Convenient, scoped combo packages are also available, featuring a UTG® AccuShot™ 1-4x28mm scope with extended eye relief (6 to 9 inches). The AccuShot optic also has the patented EZ-TAP® Illumination Enhancing System with red/green Dual-Color Mode and Multi-Color Mode (36 colors) to accommodate all weather and light conditions. Low-profile, lever-lock UTG rings and flip-open lens caps are included.

Adding to the virtues of this ruggedly-built, all-purpose platform is Mossberg's patented Lightning Bolt Action™ (LBA™) Trigger System that delivers a crisp, creep-free trigger pull and is user-adjustable from 3 to 7 pounds; a classic stock design with stippling on the pistol grip and forend, finished in a matte black, coarse texture; exposed metalwork features a matte blue finish; front and rear sling swivel studs; spiral-fluted bolt; oversized bolt knob; and 10-round capacity magazine. And because of its patented designs, the MVP Scout can be used with both M1A/M14 and AR10-style aftermarket magazines.

Combining the classic features of a Scout rifle, as described by Col. Jeff Cooper, with the breakthrough design of Mossberg's MVP Series bolt-action rifles elevates the definition of Scout rifle to a new level. To see more information on the MVP Scout as well as the complete line of MVP bolt-action rifles, please visit our website at www.Mossberg.com or your local Mossberg dealer today.

Safety and safe firearms handling is everyone's responsibility.
