**FOR IMMEDIATE RELEASE**  
**January 17, 2017**

**Mossberg® Returns 590A1™ Magpul® 9-Shot Shotgun to Tactical Line-Up**  
*Premium MilSpec Pump-Action Brought Back by Popular Demand*

**North Haven, CT** – Originally offered as a RSR Group Exclusive in 2014, Mossberg is pleased to bring the 590A1 Magpul 9-Shot shotgun back to its line-up for 2017. Pairing our 12-gauge pump-action platform with Magpul Industries’ SGA™ adjustable stock and MOE® forend; XS® Sights Ghost Ring sight system; and other premium features elevates this tactical shotgun above all of the rest. And don’t forget, it’s the only pump-action shotgun to pass U.S. Armed Services MilSpec 3443 requirements for endurance, accuracy and quality.

The 590A1 is based upon Mossberg’s proven 500 pump-action platform with standard features that include non-binding twin action bars; positive steel-to-steel lock-up and anti-jam elevator; dual extractors; anodized aluminum receiver; and universally-recognized, ambidextrous top-mounted safety. Combined, these features ensure smooth, reliable operation. Enhancements to the 590A1 are an increased 9-shot capacity with 2 ¾-inch shells (one less with 3-inch shells); 20-inch heavy-walled barrel with open-ended, flush magazine tube design for ease of cleanout; metal trigger guard and safety button; and durable Parkerized finish on exposed metalwork.

A premium shotgun requires premium accessories and the 590A1 Magpul 9-Shot doesn’t disappoint. With Magpul’s SGA adjustable stock, customization of length-of-pull (LOP) is as simple as adding the half-inch stock inserts, allowing for a LOP range from 12.25 – 14.25 inches. The ambidextrous stock design provides improved grip ergonomics for right or left-handed shooters. Other features include recoil-taming butt pad and optional cheek risers for use with optics or raised sights. Receiver and barrel-mounted sling plates provide for attachment of various sling styles. Magpul’s MOE forend features an extended length and is designed with front and rear hand stops for improved manipulation. The forend is also compatible with Magpul MOE rails for ease of adding accessories. Completing this 590A1 package is an XS Ghost Ring sight consisting of an anodized aluminum, receiver-mounted rail and precision-machined, steel Ghost Ring sight (adjustable for windage and elevation) paired with an AR-style, white stripe front sight.

Field-proven, MilSpec-approved and designed with premium features, the 590A1 Magpul 9-Shot is a shotgun you can depend on. For more information on the complete line of 590A1 Tactical pump-action shotguns, please visit [www.mossberg.com](http://www.mossberg.com).
