Mossberg® Upgrades 590® and 590A1™ Shotguns with M-LOK® Forends

NORTH HAVEN, CT – Mossberg's legendary 590 and 590A1 tactical pump-actions will be upgraded with the Magpul® M-LOK modular mounting system integrated into the forends. This update applies to the 590/590A1 models that previously featured Tri-Rail forends. One 9-shot 590 Tactical with 20-inch barrel and five 590A1 Tactical models with optional 18.5 or 20-inch barrel lengths will be offered.

The new forend incorporates M-LOK compatible mounting holes on both sides and the bottom which allows for attachment of Magpul rails, simplifying customization of your 590/590A1 shotgun. Attach a variety of tactical accessories and lights in minutes to meet your needs (rails and accessories not included).

Available features on select models include 7 or 9-shot capacity; matte blue, Parkerized or Marinecote metal finishes; bead or Ghost Ring sights; and choice of full length, 6-position adjustable or +4 Shell Holder stocks.

Based on the venerable 500 pump-action platform, 590 and 590A1 shotguns feature non-binding twin action bars; positive steel-to-steel lock-up and anti-jam elevator; dual extractors; drilled and tapped receivers; cylinder bores; and universally-recognized, ambidextrous top-mounted safety. The 590 also has a convenient clean-out magazine tube with cap for ease of maintenance. 590A1 models are built to rugged MIL-SPEC requirements and feature heavy-walled barrels; metal trigger guard; and metal safety button.

Mossberg provides the performance and reliability demanded by military, law enforcement, and consumers worldwide with their family of duty-proven 590 and 590A1 pump-action shotguns. For a complete list of available models, please visit www.mossberg.com.

Magpul® and M-LOK® are registered trademarks of Magpul Industries Corp.
