Tactical Night Train™ Packages Now Built on New Patriot™ Bolt-Action Platform *Mossberg® Delivers Custom-Inspired Rifles Outfitted for the Long-Range Shooter*

North Haven, CT – Mossberg Night Train tactical rifle packages have been known for combining tack-driving accuracy with the most-popular, long-range tactical accessories; straight from the factory. Now these custom-inspired, range-ready packages are built on the latest platform from O.F. Mossberg & Sons, Inc., the classically-styled Mossberg Patriot bolt-action rifle. Three Patriot Night Train scoped combos are available, including a 300 Win Mag chambering with a suppressor-ready threaded barrel and removable SilencerCo® muzzle brake, and two 308 Win offerings with standard 22-inch barrel or optional threaded barrel/muzzle brake package.

The Patriot bolt-action rifle is based on Mossberg's proven twin-lug, push-feed machined-steel action matched to a button-rifled, 22-inch fluted barrel. Constructed of carbon steel, these standard contour barrels are free-floating and have a twist rate of 1 in 10 inches to optimize performance. The standard Night Train 308 Win package features a recessed crown, and on the Night Train 2 (308 Win) and Night Train 3 (300 Win Mag) offerings, the barrels are threaded for use with the included SilencerCo Saker™ muzzle brake, utilizing the Trifecta™ quick-detach mounting system. A thread-protector cap is included. Metalwork features a non-reflective, matte blue finish. The classically-styled synthetic stock has a straight comb and raised cheekpiece in choice of black (308 Win only) or OD Green finishes. The Night Train 2 and Night Train 3 packages include a neoprene, comb-raising kit with interchangeable insert pads for a custom-like fit. The Patriot also features a re-engineered, streamlined bolt handle design with oversized bolt knob for smooth bolt operation, even with gloved hands. Completing the basic rifle package is a lightweight polymer, flush box magazine with 4-round (300 Win Mag) or 5-round (308 Win) total capacity; spiral-fluted bolts; receiver-mounted, Picatinny rails; factory-mounted, variable riflescopes by Leapers® with lens caps and sun shade; and dual front and rear sling swivel studs.

At the core of the Mossberg Patriot Night Train accuracy is Mossberg's patented LBA™ (Lightning Bolt Action™) Adjustable Trigger System. Constructed for the utmost in durability and reliability, the LBA trigger assembly is machined from aircraft-grade aluminum and hard-coat anodized to military spec, preventing corrosion and minimizing wear. With its distinctive, skeletonized "lightning bolt" trigger blade, the LBA Trigger System offers a truly crisp, creep-free trigger, optimizing accuracy and shot-to-shot consistency, and is user-adjustable from 2 to 7 lbs.

Available packages include: **Patriot Night Train (308 Win)** - Leapers 4-16x50mm riflescope with mil-dot reticle and sun shade; bi-pod; classic synthetic black stock; and standard 22-inch barrel. **Patriot Night Train 2 (308 Win) and Patriot Night Train 3 (300 Win Mag)** - Leapers 6-24x50mm riflescope with illuminated mil-dot reticle and sun shade; bi-pod; 22-inch threaded barrel with SilencerCo Saker muzzle brake and Trifecta QD mounting system; thread cap; and OD Green synthetic stock with neoprene comb-raising kit.

Safety and safe firearms handling is everyone's responsibility.
